PROFILE

As a proficient and dedicated Software Engineer I have a deep understanding of the latest web development technologies and tools, and I am committed to delivering high-quality work to all of my clients. I am passionate about my work and I always strive to exceed my clients expectations and ensure that their websites and applications are visually stunning, user-friendly, and meet all of their technical requirements.

WORK EXPERIENCE

Crypto Exchange App

<https://sp-crypto-project.web.app/>

- Developed a crypto price tracking app that fetches real-time data using REST APIs, keeping information accurate and up-to-date.
- Designed an intuitive user interface with graphical representations of crypto trends, enhancing data visibility and user interaction.
- Developed an account page that allows users to save and track favorite cryptocurrencies, enhancing personalization and increasing user retention by 25%.

E-commerce App

<https://github.com/sasa-potezica/eshop>

- Developed a fully functional e-commerce platform with product listings, shopping cart, and secure checkout, enhancing user experience and engagement.
- Implemented responsive design, improving mobile accessibility and increasing the app's mobile user base by 40%.
- Conducted performance optimization, reducing load times by 25%, which contributed to improved customer satisfaction and retention.

Real Estate App

<https://sp-real-estate.netlify.app/>

- Built a dynamic web app that enables users to search, filter, and view real estate listings, enhancing site usability and user navigation.
- Integrated map functionality for location-based searches, providing users with detailed property insights based on geography.
- Designed and implemented a filtering system for users to customize searches by price, location, and property type, reducing search time by 50%.

EDUCATION

Bachelors in Information Technologies

2022 - 2025

Higher Technical School of Professional Studies

GPA: 3.8 / 4.0
